

INTERIM Report No. AU31181756

Page 1 of 4

Sarah Goodwin
Brilliant Group Pty Ltd

Issue Date
Expiry Date

28 April, 2023
27 April, 2024

For assistance please ring 1300 BARCODE (1300 227 263) and ask for the Melbourne/Sydney Help Desk

Meets all GS1 Minimum Guidelines

Description: Jack Hammer Door Wedge 2 Pce
Type of bar code: EAN-13
Number/data encoded: 9311436303452
Print method:
Number of bar codes on item: 1
Substrate: Interim
Country of Origin Label: No
Sample type: Laser Print

Note: Due to possible variations in print quality the ISO grade given on this report is only applicable to the sample provided.
Due to different scanning environments the scan rate shown on this report should be used as a guide only.

Testing Summary

Complies to Minimum GS1 Specifications

Omni-Directional Retail Point of Sale	✓
Hand Scanning	✓
Complies to GS1 Location Recommendations	N/A
ISO Grade (0.0 - 4.0)	N/A
Scan Rate	100%

Business Critical Comments

Analysis

GS1 Specifications

Parameters	Comment Reference	Assessed	Complies to Specifications	Minimum GS1 Specifications required
X-dimension (Magnification) for Omni-Directional RPOS		101%	✓	80% - 200%
X-dimension (Magnification) for Hand Scanning		101%	✓	80% - 200%
Barcode Height		22.85 mm	✓	22.85 mm
Quiet Zones (Left)		10.00 mm	✓	3.63 mm
(Right)		10.00 mm	✓	2.31 mm
Data Check Digit		2	✓	2
General Representation			✓	
Validity of GS1 Company Prefix			✓	
Other Compliance Issues	(3)		✓	
Location	(2)	Not Assessed

Page 3 of 4

Minimum ISO Pass Grades - BarCode Type	Grade
EAN-13, EAN-8, UPC-A, UPC-E, GS1-128, GS1 Databar, GS1 Datamatrix and ITF-14 less than 62.5% Mag.	Pass = 1.5 - 4.0 Fail = 0.0 - 1.4
ITF-14 greater than 62.5% Magnification	Pass = 0.5 - 4.0 Fail = 0.0 - 0.4 Note: In general distribution a grade less than 1.5 may cause scanning difficulties.

Educational Comments

- 1 The ISO parameters cannot be assessed as the sample has been supplied as artwork or a digital file and does not represent the printed material.
Please note: The ISO parameters are impacted by the print quality, registration, background colour, bar colour and other processes related to the printing of the barcode.
- 2 Location cannot be assessed as the sample has been supplied as artwork or a digital file and is not in a formed state.
- 3 All assessments have been based on artwork which has been supplied as either a hard copy or digital file. It should also be noted that the results achieved on this report, are not reflective of the actual printed material.
We would strongly recommend that the actual printed material in its final formed state also be sent for barcode verification. Also please note ITF-14 barcodes with a magnification (X-dimension) less than 62.5% should not be printed directly onto corrugate board.

Product Dimensions Section

GS1 Australia has the facilities to measure product dimensions for products sent for barcode testing; these dimensions may be required for space management purposes. To obtain dimensions a complete formed sample must be supplied.

Product Imaging Section

GS1 Australia provide an imaging service to both members and non-members. If product images have been requested by your company you will be notified upon the completion of imaging.

Some important notes about this report:

- This Barcode Verification Report may contain privileged and confidential information intended only for the use of the addressee named above. If you are not the intended recipient of this report, you are hereby notified that any use, dissemination, distribution or reproduction of this message is prohibited. If you received this message in error please notify GS1 Australia.
- This Barcode Verification Report is valid for 12 months from the date of issue.
- Unless otherwise advised or stipulated by your company, all details relating to the product sample/s submitted will be made visible to the National Product Catalogue user community 28 days after the date of submission, as well as other subscription services of GS1 such as GS1 Australia Smart Media, depending on user settings.
- All samples will be disposed of within seven days of the Barcode Verification Report being issued or, upon request, returned to the submitter in accordance with their directions and at their cost.
- The scan rate is an indication of how the barcode performed on one scanner. As various scanners decode barcodes in different ways, any shortcoming of a barcode may result in a varied level of performance across different scanners.
- It is the responsibility of the GS1 member company to ensure the correct use of the GS1 Company Prefix or directly allocated GS1 Identification Key. The correct allocation of a barcode number is the responsibility of the owner. Where a GTIN has been allocated to a product, and it has been introduced to the market, under no circumstance must it be transferred or reused for any other product.
- Rejection of products by your customer/s should not necessarily be based solely on a Barcode Verification Report with an out of specification result.
- GS1 Australia's Barcode Check service uses ISO accredited verification equipment to assess the compliance of the barcode to GS1 standards based on ISO/IEC 15416. Should a dispute arise over any failed results from GS1's equipment, an internationally recognised and independent arbitrator can be used, on request, to gain an impartial ruling on the accuracy of the verification equipment. The cost of arbitration will be incurred by the Barcode Check customer in advance, but will be reimbursed should the arbitrator's assessment confirm a passing ISO grade.
- GS1 Australia's assessment of the Country of Origin Label (CoOL) is based on the sample sighted. It is the responsibility of your company to ensure the CoOL has the correct content in accordance with the applicable legislation and is correctly applied to all required products.

Retailers Access Option:

You are currently opted in for the Retailer Access Option

Please note Retailers authorised by GS1 Australia may electronically request a copy of any **passing** reports by specifying the GTIN (barcode number) of the product. Retailers have warranted that requests will only be submitted for products that are either being ranged or are on range within their systems.

Reports without a passing grade are not shared.

If you do not want your passing reports to be discoverable by authorised retailers, you can opt out of this service for all reports issued to your company by contacting the Testing Services Team at GS1 Australia.
